PROFILE

IT Support Coordinator and final-year Bachelor of Information Technology student, supporting network infrastructure and POS systems under SLA-driven conditions at major live-event venues. Full-stack developer with a real, in-production web product, plus a customer-facing hospitality background that built composure and speed under pressure. Seeking an entry-level Data, BI, or technical role that combines hands-on IT experience with a data-driven, continuous-learning mindset.

EXPERIENCE

IT Support Coordinator — Merivale, Sydney

- Support network infrastructure and POS systems at major live-event venues — including AFL matchdays at the Sydney Cricket Ground (Sydney Swans) with crowds of 40,000+ — ensuring operational continuity under pressure.
- Investigate and resolve critical incidents within SLA targets using structured troubleshooting and root-cause analysis.
- Keep POS operations running during peak matchday and event hours, protecting uninterrupted revenue flow at full-capacity crowds.
- Work closely with internal teams and third-party vendors to streamline support operations and improve system performance.

Bartender — 5 years of experience (Ireland and Australia)

- Delivered fast, accurate service in a high-volume bar, handling large drink orders during peak trading and busy event nights.
- Operated the POS system and managed cash and card payments, reconciling the till at close with a focus on accuracy.
- Kept service running smoothly under pressure by prioritising tasks, communicating clearly with the team, and resolving customer issues on the spot.

PROJECTS

Taropeuta — Full-stack booking platform for a live tarot & astrology business (Next.js / React / Vercel) live site

- Designed and shipped a full-stack, bilingual (PT/EN) web platform — live in production and used by a real business — owning UI, application logic, and data persistence, deployed on Vercel.
- Built the end-to-end booking flow: service catalogue, five pricing tiers, client intake, and automatic timezone conversion, turning manual WhatsApp scheduling into a structured digital system.
- Integrated tarot and astrology offerings (including birth-chart readings) with WhatsApp audio delivery and a mobile-first, responsive UI, plus privacy controls that let clients export or delete their personal data.

TECHNICAL SKILLS

Development: Java, Object-Oriented Programming (OOP), JavaScript, React, Next.js, HTML/CSS, full-stack & responsive web apps, REST APIs, Vercel, Git & GitHub, GitHub Actions (CI/CD), GitHub Pages
Data & Analytics: Python (pandas, NumPy, matplotlib), data cleaning & visualisation, statistical modelling & Monte Carlo simulation, SQL (SQLite)
Analysis & Methodology: SDLC, UML modelling, requirements gathering, user research & surveys, Gantt / PERT planning
Languages: English (professional), Portuguese (native)

EDUCATION

Bachelor of Information Technology (in progress)
Academy of Interactive Technology (AIT), Sydney | Feb 2025 – May 2027
General Business Program (108 hrs) • Market Sizing (6 hrs) — Business Training Company, Brazil
